UAE "THE WORLD CAPITAL"

The United Arab Emirates is a federation of seven states formed in 1971. Since then, UAE has grown rapidly to be one of the Middle East's most important economic centers.

Before oil was discovered in the 1950s, the UAE's economy was dependent on fishing and a declining pearl industry. But since 1962, when Abu Dhabi became the first of the emirates to begin oil exporting, the country's society and economy have been transformed.

The late Sheikh Zayed, ruler of Abu Dhabi and president of the UAE at its inception, was quick to seize on the potential of the oil industry. He oversaw the development of all the emirates and directed oil revenues into healthcare, education, and the national infrastructure.

But the UAE's authorities also tried to reduce its dependency on oil exports by diversifying the economy, creating booming business, tourism, and construction sectors. While Abu Dhabi remained relatively conservative in its approach, Dubai, which has far smaller oil reserves, was bolder in its diversification policy.

Particularly during the credit boom that built up after 2000, Dubai sought to turn itself into the financial gateway and cosmopolitan hub of the Middle East.

It also began attracting vast amounts of foreign investment for ever more ambitious construction projects, most famously the Burj Khalifa skyscraper, the world's current tallest man-made structure, and futuristic land reclamation projects, such as the palm-shaped artificial Palm Islands.

After winning the bid to host the World Expo 2020, Dubai, whose economy is already booming, will attract additional investments in its infrastructure, analysts say.

The emirate has already announced some key infrastructure projects, including the metro network extension and a new district for the global design and fashion industry.

According to Dubai's Ministry of Economy, the sheikhdom's real gross domestic product (GDP) grew by 45 percent in 2013, benefiting from an increase in trade, logistics, tourism, and banking, as well as a comeback of the real estate sector.

MADINAT BROADWAY OVERVIEW

Madinat Broadway Technical Contracting (MBTC) is a renowned name in the GCC markets of Saudi Arabia and UAE for a cumulative experience of 20+ years. The company was initially founded in 1994 under the name 'Binsliem'. Since its inception, it has promptly worked in GCC, serving various sectors in multiple services.

For 20 years, we have been dedicatedly served our clients with honesty and far-reaching principles. Our KSA branch was inaugurated with commendable HVAC services which after expansion, have been extended to MEP, Building maintenance, Recruitment, Interior Design, etc., that deals explicitly with construction projects.

The company targets consumers and businesses focusing on well-established services. Madinat Broadway Technical Contracting presents a diversified range of services that have allowed to gain expertise in the Civil, Technical, and Mechanical industries, to name a few. Over the years, we have thrived as an all-rounding establishment that has catered to well-known clients.

Madinat Broadway Technical Contracting has leaped to explore and improve services and branches based on international standards and in well-known sectors. We have offices in UAE, Croatia, India, and the UK. In the KSA, we provide services under the name Madinat Brod Wad General Contracting, specializing in the construction industry. Our branch in Croatia and UK provides recruitment services to industries including Hospitality, Civil, Mechanical, Oil & Gas, and more.
